Circle Report

Hannibal was bemused to find a long & informed history of Lugarno on a board close to the On On but continued on with his better knowledge of the area anyway **Anyway - shit**. It's apparently 23 kms from the city via Punchbowl but a lot shorter if you travel direct from the Highway & Forest Road. Convicts were supposed to have built something there but, considering it wasn't inhabited until the twentieth century, the bloody convicts must've been very old - about 120 I believe - so they were really tough old bastards. They also built all the hills we countered on the run & the punt that ran from Alford's Point, where there were no inhabitants either or roads or anything really so it was just like the Tibby Cotter Bridge, somebody in government said just build it & they will come & they did, about 100 years later. So there may be hope for the TC yet. There's no trams to Lugarno (yet) don't tell Clover cause she'll build the bloody useless heap of shit but the Punchbowl bus company services the area, which makes it easier to access the Mosque in Punchbowl; if there were any Muslim workers (hah there's an oxymoron) with enough money to buy into the area. **Pseudo** reckons and there was cheap once just before he was born I think.

Run Report

Loan Arranger had been selected to officiate over the last rites to the run & rambled on about fucking hills for 10 minutes & then said something about bikes & learners permits, a pub & a ute covered in grass & gave the run 10 out of 10 - you don't have to be that generous to get a root out of **Holeproof**.

Visitors: - Tardis from somewhere - dunno, Curtseying from Sylvania via Germany, Meltdown from Sutherland & DNF from every pub in the southern hemisphere.

Athletes: - None.

Birthdays: - Pseudo 70 years young according to Holeproof.

New Shoes: - Joker & I'll keep mentioning it until he gets to drink out of them.

Prickette and Prick nominations

Squatting Squaw was nominated by **Cold Duck** for telling him she had a wet dream about him, which is entirely different to **Dirty Weekend**, who has dry nightmares with her earplugs.

Cold Duck was nominated by **Hannibal** for sprouting off about someone having wet dreams about him & he's probably still telling anyone who'll listen so he deserves everything he gets. And he left early so he could watch his Sharks being beaten again, you'd think he'd learn.

Pricks – Squatting Squaw & Cold Duck

Hash House Harriers (1938), Kuala Lumpur, Malaysia, is pleased to announce that it will be holding a celebration to observe its 80th Anniversary in September, 2018. Hashers from all corners of the hash diaspora bearing our name, or variations of it, are cordially invited to 'return' to the cradle – and the Eden - of hashdom, for a grand extravaganza in celebration of this momentous milestone. Participants will get to be a part of what is shaping up to be the largest congregation of hashers the world has ever known. Motherhash is ready to welcome you back to the origins; be transported back in time to where our hash forebears first germinated and gave birth to our very realm. Gispert and his band of trailblazing initiates of 1938 will be on hand, metaphorically, to welcome you back to our spiritual home, the HASH HOUSE. Yes, Motherhash's 80th Anniversary will conjunct with the unveiling of the resurrected HASH HOUSE, albeit by necessity in a different locality.

Be the fortunate first 1000 registrants, and pay only USD80.00 for the hashing experience of your lifetime! Registrations can be done online. Visit our website at: www.motherhash.com, and click on the link to our 80th Anniversary.

Please note that registrations are only accepted via our online registration portal as mentioned above, so please help out your friends who are not so IT savvy. We will not accept any hard copy or direct registrations. This 3 days event is open to ladies as well.

On On to the BIG 80th!!!

Hardy Boy Organising Secretary Motherhash's 80th Anniversary

Ps We strongly suggest, the real hashers register quickly before the Early Bird rate is all taken up – 518 at time of writing.

Dundee's Rant of The Week

What do you consider to be the most convenient, money & life saving invention of our time? I believe it's the driverless motor car. Think of the benefits to our society – no more licences to drive – no more speed cameras or police to accost offending drivers – no more accidents on the roads so insurance will be unnecessary – you'll be able to drive home pissed to the eyeballs just like the old days before the RBT, a real boon to Hash people & the aged (Hash people) as long as you can still speak reasonably distinctly after 20 beers or you could end up in Perth instead of Parramatta. Take me home burp.... Fart..... oh no I've pissed myself again.... wonder what's on TV etc... A real boon to the drinking class.

Snickers' Serious Scientific Summations

Further to Dundee's rant above, unbeknown to anyone, Snickers has been developing his own driverless vehicle, which will be a distinct difference in workmanship & operation from those inefficient car companies, which are run by semi bureaucratic managements. Instead of electric vehicles powered by the grid from coal burning plants or hydrogen powered vehicles utilising one of our most precious resources – water, Snickers will be using the methane from his Fart Factories to power his vehicles. This will be the best use for the resource as he's also developing a catalytic converter to fully utilise the available energy in the engine. All this is very hush hush at this stage but he envisages the vehicle will be able to drive to Perth & back on a single tank of farts. If refills are required on the road he's also devising regular fart stations located in strategic places on the major highways, housed & run by a robotic system of incredibly beautiful scantily clad women (robots which look like women & agree with everything you ask them).

Major problem is the smell emanating from the engine which he still has to overcome – using robots fixes part of the problem – but

he feels this could be his Nobel Prize in the making. Bloody brilliant work from our Scientific Guru.
